

Fits any Arai helmet by replacing the standard breath guard. Attach the side skirts, to match your particular face by positioning the end tabs as needed. Quick and easy enough to install for that cold morning ride to work, and take off at the end of the day for that warm ride home.

REDUCES FOGGING OF THE SHIELD

PRO BREATH MASK

The flexible design makes getting the helmet on and off easy and comfortable, and doesn't tug at your face every time the helmet moves.

Soft foam design covered with breathable material with a soft seal against your face. Blocks your warm breath from reaching and fogging the shield but does not block the airflow from the chin vent, so you get all the fresh air you need to stay cool and comfortable.
