

# VECTOR-2®

Experience makes the difference!  
www.araiamericas.com

## COMPLEX SIMPLICITY

The new Vector-2 expands the original Vector's combination of Arai's philosophy (designed for the real world instead of the lab world) with a simpler, more affordable, less-is-more design concept.

What becomes immediately obvious is that, while still adhering to its less-is-more design intent, the new Vector-2's impressive array of features, benefits, updates and upgrades delivers an Arai Helmet in which more costs less.

The new ACR-2 rear exhaust vent/wing combination has air inlets, tuned in Arai's wind tunnel, to accelerate air over three 10mm holes in the shell, greatly improving ventilation performance.

The refinements of the ACR-2 greatly increase the efficiency of removing interior heat buildup.

A single large slider operates all 3 vents simultaneously.

The ACR-2 is now available as an accessory part.

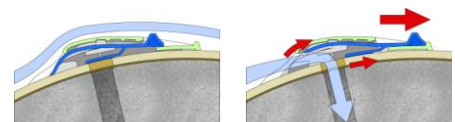

Larger side exhaust ports increase airflow, but careful attention has been paid to keeping noise levels down.

Wider eye port, providing an additional **5mm** at each side, increasing peripheral vision for greater situational awareness of your surrounding environment.

The front intake looks identical to the previous Vector vent, but upon closer inspection, the difference becomes apparent as the new ACF-2 front intake vent incorporates a sliding door that closes the oversized intake opening completely.

At the same time the outer gate closes the intake opening, an inner plate slides over and closes the hole in the shell.

The ACF-2 is now available as an accessory part.

# Foundational feature of all Arai Helmets

Found in every Arai helmet is the basic and simple organic shell shape.

A helmet is first and foremost an **Energy Management System!** From ventilation to aerodynamics, shield systems, radio, blue tooth and graphics; everything comes secondary and none should ever interfere with the helmets number one job of **Impact Energy Management!**

Arai looks to the incredibly strong shape of an egg for inspiration, with the **smooth uninterrupted spherical shape transferring stress loads more evenly across its entire surface.**

The absence of exaggerated edges or protrusions in the shell is not a lack of creativity, but a commitment to maintaining the integrity of the shell with real world impact performance in mind, the kind a rider might encounter on the unpredictable streets where impacts are anything but controlled or predictable.

## Additional features of the new VECTOR-2®

- Latest generation “**SAI**” shield is 5mm longer on both sides, which in concert with the corresponding 5mm wider eye-port of the helmet provides the rider with an enhanced peripheral field of view, greatly improving situational awareness of the surrounding environment.

- Along with the new “**SAI**” shield, a new “**SAI**” base plate design is used to further improve the shield system.
- Repositioned upper mount point allows for greater flexibility, reducing stress during normal shield operation.

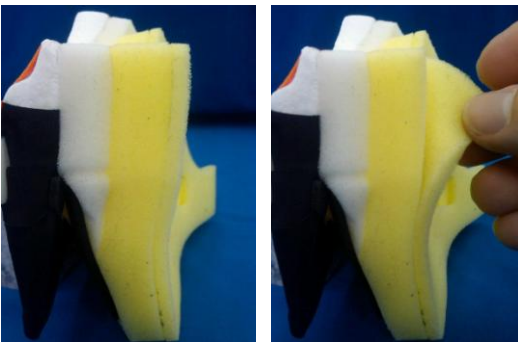

- Multi-Density (up to 5 in some models) Single piece EPS liner provides exceptional impact energy management, while keeping the overall size and weight of the helmet to a minimum.

## Additional features of the new VECTOR-2®

- New **fully removable liner**, designed with a full perimeter crown pad, with minimal frame support, for increased comfort.
- New cool grey color on Arai's traditional brushed nylon material maintains an incredibly soft feel.
- Removable/replaceable cheek pads, with removable and washable covers.
- **Both the liner and cheek pads are exclusive to the Vector-2 model.**

- The incredible feature of the **5mm peel away cheek pad layer**, first introduced on the RX-Q and now available on the Corsair-V, is standard on the Vector-2.
- This feature gives the customer the option of a thinner cheek pad set, for a custom micro-fit, without having to purchase an optional set.

- Expanding on the benefits the 5mm peel away cheek pad design, the Vector-2 is the first model to incorporate **5mm peel away temple pads**.
- Adding to the benefits of multiple interior shapes, this feature now **takes micro-fitting within an interior shape to a higher level**, giving the wearer advantages **offered only by Arai**.

- **Hyper-Ridge** around the bottom of the shell **enhances strength** and **allows for a larger bottom opening**, making it **easier to put on and take off the helmet** without adding weight or increasing the shell size.

## Optional features

- Available **SAI MAX-VISION** Anti-Fog shield, and optional Anti-Fog Pin Lock lens'.
- Full eye port "Cavity" accepts exclusive Pin-Lock® lens insert to provide exceptional anti-fogging performance across the entire field of view!
- Insert lenses available in **five color/tint options**.

- It is extremely important to note that the Comfort Head Liner and the Cheek Pad sets are **Exclusive to the Vector-2** model and cannot be interchanged with interior components from other models.
- It is also important to note that the **installation & removal technique for the Vector & Vector-2 cheek pads is opposite** of all other Arai cheek pad types.

- To remove the cheek pad, pull up and slightly forward on the rear section below the ear pocket, until the pad comes out of its seat. Then slide the entire pad back until the front tab clears the chin liner pad.

- To reinstall the cheek pad, feed chin strap through the hole, slide front tab of cheek pad under the chin liner pad and then press the rear section of the pad down until properly seated.
- Make sure chin strap is not twisted and is fully extended through the pad.
