## Advantages of Arai's exclusive AirWing®

Following the concept of multiple interior shapes for different head shapes, Arai now offers multiple aerodynamic options for different riding styles.

At race speeds, or a full tuck position, run the AirWing® in a lower position.

While riding sport or standard, run the AirWing® in a mid position.

In upright riding positions, the AirWing® performs best in an upper position.

Arai's exclusive AirWing® provides unprecedented aerodynamic performance options with 5 distinct positions.

Newly designed side exhaust cowls exhaust heat, as well as add lateral stability at speed.

Peripheral Belting across the forehead area of the shell enhances structural integrity while maintaining flexibility, low weight and shell size.

Enhanced air inlets on the new DF-10 diffuser design increase airflow efficiency.

Brow vents now duct cool air to the temple area.

In combination with the new side exhaust cowls, the flow of fresh air helps the helmets overall ventilation system by cooling the ears.

# Key features of the new Corsair-V

- Larger upper vent tabs make operating these vents, even with thick winter gloves, much easier than before.
- The newly designed Hyper-Ridge enhances shell strength and enlarges bottom opening for easier putting on & taking off, without increasing helmet size or weight.
- New 1-piece design bottom edge trim improves the already sleek look of the Corsair-V, but also helps reduce weight.

- **Wider eye port**, with an additional 5mm on either side, greatly increases the peripheral field of view and provides **exceptional situational awareness**.
- Arai's "I" shield is the latest generation of Super AdSis shield system, designed for the 10mm wider eye port on the Corsair-V.
- In concert with the new "I" shield, a new "I" base plate design was created to further improve the shield system by increasing system flexibility that not only makes shield removal & installation easier but also increases system durability by eliminating stress points on key components.

- Latest Generation Dry Cool® liner has perforated material for enhanced cooling.
- Removable/replaceable neck roll, with additional vents.
- Exclusive **Emergency Release Tab** feature allows trained emergency personal to remove cheek pads quickly & easily enabling them to remove the helmet from an unresponsive rider, if needed, with minimal effort.

Found in every Arai helmet is the basic and simple organic shell shape.

A helmet is first and foremost an **Energy Management System!** From ventilation to aerodynamics, shield systems, radio, blue tooth and graphics; everything comes secondary and none should ever interfere with the helmets number one job of **Impact Energy Management!**

Arai looks to the incredibly strong shape of an egg for inspiration, with the **smooth uninterrupted spherical shape transferring stress loads more evenly across its entire surface.**

The absence of exaggerated edges or protrusions in the shell is not a lack of creativity, but a commitment to maintaining the integrity of the shell with impact performance in mind.

## Spencer Limited Edition 25<sup>th</sup> Anniversary Replica

To commemorate the 25th anniversary of Freddie Spencer’s historic double championship in both the 250cc and 500cc GP class in 1985, an accomplishment still unmatched to this day, Arai is releasing the original replica design worn by Freddie that year in a limited production run.
