

CLEAN, SHARP & BRIGHT!

Just a few words to describe the new Nitrous design on the VX-PRO'3. If your looking for a cool new graphic, the new Nitrous delivers just that in a choice of four color options. And while the new Nitrous design lets you ride in style - giving those around you something to appreciate, the VX-PRO'3 delivers performance on the inside - giving you even more to appreciate.

- * Interior shape that more closely matches your head shape for unparalleled comfort.
- * Low center of gravity for better balance and reduced fatigue over a long ride or extremely rough conditions.
- * FCS cheek pad designs offers tremendous stability and support without painful pressure.
- * Upper, lower, front and rear ventilation that flows more air than you can imagine - keeping you cool and comfortable even in extreme conditions.
- * Smooth, compact shell design to manage the reality of those instances when you might meet the ground unexpectedly.

The new VX-PRO'3 Nitrous delivers performance every rider deserves in a style that every rider can be proud to show off.
