

ADVENTURE IN STYLE

The XD-4 continues to outpace expectations, setting record sales levels well above those set by the XD-3 that came before. Among its many improvements, the XD-4 has increased ventilation all around as well as a micro fit interior with peel away foam layers in both the cheek and temple areas, allowing for some custom fitting without the need to purchase optional pads.

New for 2013 is the Diamanté design, offered in four color ways. A brilliant metallic clear coat gives each one a brilliant finish.
