

VECTOR-2 NAKASUGA

>> VECTOR-2 NAKASUGA

While perhaps not a household name in the states, yet, Nakasuga has been working his way up the Ladder. Recently Nakasuga was chosen to fill in for the injured Jorge Lorenzo on the factory Yamaha for the final Moto GP round in Valencia where, in his first Moto GP race, he finished second. The Nakasuga design has a bold look, with some aspects of depth where the various design elements overlap one another, but the most striking feature have to the Big Eyes. Arai fans will remember these eyes from the previous Nakano replica series. Nakasuga cut his racing teeth on the same team Nakano started with, and the Big Eyes are a trademark of that teams founder and patriarch, SP Tadao. The Nakasuga is due to arrive in the US market in February, so be sure to ask for it by name. And as always, this design needs to be seen in person, as it is impossible to do it justice in a photograph.

>> **The VECTOR-2** Arai's "basic" helmet is anything but. We call it Less is More, but like everything from Arai, our emphasis is on More.
