

PRO TACTICS

Two variations of the exciting new Tactical design are now available on the Signet-Q Pro-Tour. The Tactical White features a white base color with a gloss clearcoat and the Tactical Green utilizes Arai's exclusive Frost finish atop a dark green finish.

While each version has a very unique look, both feature distinctive, military-inspired graphics that must be seen in-person to fully appreciate the attention to detail of the design.

The standard benefits of the new Pro-Tour version of the popular Signet-Q include the Pro Shade System shield, anti-microbial Eco-Pure interior lining to keep your helmet fresh between cleanings, and pre-cut speaker recesses in the cheekpads.

Visit Araiamerica.com or your local Arai retailer to these and all the other new designs in our 2015 lineup.
