

**SIGNET-Q**

**PRO TOUR**

**Who says that you can't have it all?**

The new Pro Tour version of the Signet-Q features unique benefits over and above the already exemplary standard features of the long-oval Signet-Q.

There are three additional features included in the Pro Tour version:

**Pro Shade System**- Normally an option, the Pro Shade System features more benefits than a drop-down internal sunshield without compromising helmet design. **Eco-Pure Liner**- An exclusive anti-microbial liner material for the headliner, cheek pads, and neckroll stays fresher between cleanings. **Enhanced Communication**- The cheekpads feature a molded pocket to allow a more streamlined speaker installation. Continual evolution at Arai means that the best continues to get better!

**More benefits. Better protection. Only from Arai.**

**PRO SHADE SYSTEM**  
Brings Comfort To Long Touring Rides.

No internal drop-down lens can offer the same benefits and protection as the Pro Shade System. Easy transition from day-to-night or providing hands-free anti-glare function with a subtle dip of the head, the Pro Shade System excels in all conditions.

**Eco-Pure Liner**

Features Eco-Pure, an anti-microbial interior lining material.

**Communication**

Allows precise location of speakers for better performance and enhanced comfort.

**Chin Curtain**

An optional larger chin curtain keeps the cold weather under control.

**NEW OPTION**
