

# THE DRAGON RETURNS

When customers discuss their favorite older designs, one that we hear about quite often is the Okada Dragon. The new Hydra pays tribute to this theme, yet is strikingly different in both colors and detail.

Sure to be a hit with a wide variety of customers, the hallmark of the new design is incredible attention to detail, with vivid colorful additions to the silver dragon atop a black base- all covered in a Frost clearcoat which enhances the subtleties of the graphics.

The neutral colors and unique design are a perfect match for different types of motorcycles and different personalities. Get yours today.

### Key features of the Signet-Q:

- FCS cheek pads providing excellent stability at speed, while also offering incredible comfort for all day riding.
- Dry-Cool interior material for improved comfort, drawing heat and moisture away from you and in to the air flow.
- Peel Away cheek and temple pad layers for additional micro fitting, allowing you to custom fit for your unique head shape.
- MAX-V Brow-vent Pin lock shield, offers ability to change inner anti-fog lens tints using the same shield, with an incredible field of view.
