

# SHOCKING!

For those who insist on bold, bright colors, the new Electric design on the RX-Q should give you something to smile about. Sweeping lines, with contrasting accent colors makes this design "jump off the shell", making it practically impossible for anyone to miss you as you pass by.

### Key features of the RX-Q:

- FCS cheek pads providing excellent stability at speed, while also offering incredible comfort for all day riding.
- Dry-Cool interior material for improved comfort, drawing heat and moisture away from you and into the air flow.
- Peel Away cheek and temple pad layers for additional micro fitting, allowing you to custom fit your unique head shape.
- MAX-V Brow-vent Pin lock shield, offers ability to change inner anti-fog lens tints using the same shield, with an incredible field of view.
