

BRIGHT DARKNESS

New to the US market, the new Vector-2 Doom delivers a combination of a white based graphics (white based graphics seem to be making a comeback) with just a little bit of dark attitude thrown in.

The new "DOOM" graphic arrives in the US market July 2013, adorning the Vector-2 model, adding to an already impressive offering of graphics on a model that offers a unique and unparalleled fit to many Arai riders who just couldn't find a better fit anywhere else.

The Vector-2, while our least expensive model, boasts a list of features and benefits that defy its price point with fully removable comfort padding for full cleaning or custom fitment, Arai's latest FCS technology for a more comfortable and secure ride, along with excellent ventilation, 10mm wider peripheral field of view (5mm each side) and a quick change shield.

VECTOR-2 DOOM
